Author: Eirik Baug <Eirik Baug>

Date: Sat Mar 18 03:52:04 2017 +0100

   Paging with ajax now works perfectly in the user administration panel. You can now also add
profile pictures to accounts which also creates and saves a small thumbnail image of the profile
picture to the database which is used when searching for users during image tagging. this solves the
issue where you cant tell the difference between two users with the same name

commit 65f1278cfe535ac69aa9692d7915721e44569a16

Author: Eirik Baug <Eirik Baug>

Date: Wed Mar 15 16:48:01 2017 +0100

   Added userhandeling page in admin, now functional for adding, editing, viewing and deactivating
employees. Everything works with ajax and partial views for a smoother experience. same
functionality for sponsors and children also needs to be added

commit d87f670a02004de462a87f5dbc15c2042957ddf8

Author: Eirik Baug <Eirik Baug>

Date: Tue Mar 14 16:18:58 2017 +0100

   Functional prototype of the image tagging system is up. you can now tag images and then retrieve
them from the database and display the images again regardless of the displayed size of the image.
Still a lot can be done tomake it better, but it's working as intended

commit 247ccd3010d6216f19c988c8dcb6785e9f7a6389

    Significantly improved tag boxes look and feel. You can now add custom boxes by doubbleclicking on images and tagboxes can be resized and moved aswell as removed. when typing in the input field of tagboxes an ajax call goes to the server and gets the names that starts with what you typed. Clicking the detect faces button will attempt to detect and add tags automatically to the image. finally tags are now saved to the database and can be retrieved when the image is requested from the database again

commit 7daab2a428c4972822f9c03d45913b10b5b18da4

Author: Eirik Baug <Eirik Baug>

Date: Tue Mar 7 19:59:11 2017 +0100

    after a lot of work and nothing working the tagging system still does not work, but at least I can now display images before uploading them and then upload them asynchronously with ajax to the database. can also display progress. this has turned out to be a lot harder than expected...
